REHABILITATION

ABOUT US

CORES's growth is faster than ever. We developed into three branches with over 10,000 square feet in total, accommodating over 40 treatment rooms. We have been digitalizing and constantly upgrading our administrative and communication system for the betterment of our service and to follow with the rapid expansion.

Here in CORES, we firmly believe in our role to fulfill social responsibilities. Over the years, we have participated in a wide range of charitable campaigns actively, such as assisting patients to organise self-help groups to provide hydrotherapy for people in need, and fundraising for charities to promote organ donation. More volunteering plans are underway, and we hope the community can enjoy a healthy lifestyle through our passion and love for sports. We grow with the community!
